

Robotic Page Turning Book Scanner The DL-MINI Series

The DL-MINI is a series of robotic page turning scanners that require no operator intervention after the book is set up in the scanner and this scanner does a complete job of scanning from cover to cover.

The DL-MINI is a turnkey solution combining precision crafted Swiss engineered hardware and sophisticated software to deliver high quality, high resolution images requiring no post-processing.

The Series covers scanners that produce results in 400 and 600 DPI true optical resolution. The DL-MINI will be FADGI compatible very soon. For detailed specifications contact Indus.
